

Release Summary

Heading:

- Product Name: Pathfinder
- Team Name: Pathfinder Dev team
- Date: Jun 10, 2025

Key user stories and acceptance criteria:

Sprint 1:

- User Story
 - As a user, I want a map instance to be spawned to know exactly what actions I want to perform on campus.
- Acceptance Criteria:
 - Mapbox instance is created with zoom in zoom out capability
- User Story
 - As a user, I want to create a waypoint that I can create an event or navigate to
- Acceptance Criteria
 - EventForm pop up works and is possible to make an event to navigate and redirect to google/apple maps
 - Possible to make an event where the waypoint was selected

Sprint 2:

- User Story:
 - As a user, I want to find something on a map via just its name, I want to see suggestions of places I'm looking for, and when I find the name I'm looking for I want to be able to view the building in a 3d manner.
- Acceptance Criteria:
 - Users can type a name into a search bar.
 - Users can click a suggestion to view its location on the map.
 - Users can rotate, zoom, and pan the 3D view.
- User Story:
 - As a user, I want to see how many people are interested in an event, and as a club leader or event leader I want to see who's attending.
- Acceptance Criteria:
 - Users can see accurate RSVP counts when clicking on the event
- User Story:
 - As a user I want to be able to use the same app on my phone and laptop with a seamless user experience.
- Acceptance Criteria:

- A user is able to open the same application cross platform mobile and web and is still able to retain all functionality

Sprint 3:

- User Story
 - As a user, I want to add an event to my calendar directly from the RSVP dialog, so I don't forget the events I committed to.
- Acceptance Criteria
 - Users can add and save their event to google calendar to remind them
- User Story
 - As a user, I want to discover and subscribe to organizations
- Acceptance Criteria
 - As a user I can click on different events and see different event organizers leading them such as clubs
 - I can show my interest in these clubs as a whole
- User Story
 - As a user, I want to upload a flyer to promote my event and have it expire after a defined period, so promotional content is relevant and timely.
- Acceptance Criteria
 - Users can upload a flyer that is temporarily stored to show off their event
- User Story:
 - As a user when looking at external events, I want to filter based on organization type, date and time of event, what kind of event, and I want to see date, time, description, title, category of event, and how to navigate.
- Acceptance Criteria:
 - Users can see events based on different criteria in different colors on the screen depending on type of event.

Sprint 4:

- User Story:
 - As a user, I want to view, edit, or delete events I own and interact differently with events owned by others, so that I can manage my events effectively and participate appropriately in events created by others.
- Acceptance Criteria:
 - Owner of event is able to edit and delete events based on their personal, college, or club needs
- User Story:
 - As a user I want to be notified when an organization I'm interested in creates an event.
- Acceptance Criteria:
 - When an organization I'm subscribed to publishes an event I get an email notification

- Use Story:
 - As a user, I want to filter events more efficiently, so that I can quickly find the events that are relevant to me.
- Acceptance Criteria
 - UI for filtering clearly shows different types of events and includes more categories.
- User Story:
 - As a user, I want the authentication system to work reliably, so that I can log in and access features without errors or unexpected behavior.
- Acceptance Criteria:
 - Users are able to login and see events without refreshing and there are no auth bugs in production

Known Problems:

Currently in development, the routing share feature is not fully implemented as we were having trouble with the link when shared to another person.

As a user, I want to share an event with my friend via a link so they can check it out and RSVP if interested.

Product Backlog:

As a user, I want to browse a store listing all available organizations, so that I can search through them easily and subscribe to the ones I'm interested in.

- Make store for all orgs
- UI with all orgs, can search through and subscribe
- Subscription table within database
